ASSIGNMENT-3

Trends and Cloud Services

1) Serverless Architecture - Benefits

- 1) No need to manage servers.
- 2) Automatically scales with demands.
- 3) Pay only for what you use.
- 4) Faster development and deployment.

2) Progressive Web Apps (PWA)

- 1) Works like a mobile app but runs in a browser.
- 2) Can be used offline.
- 3) Sends push notification.
- 4) Install on home screen without app store.

3) AI & Machine Learning in Software?

- 1) Makes apps smarter.
- 2) Learns from data to improve performance.
- 3) Needs special tools and infrastructure.
- 4) Used in fraud detection, chat bots, and automation.

Cloud Service Model

- 1) SaaS (Service as a software): Ready made apps online.
- 2) PaaS (Platform as a service): Tools for developers to build apps.
- 3) IaaS (Infrastructure as a service): Rent server and storage.
